## 4D Minesweeper Free Download

Download ->>> <http://bit.ly/2Jlm9a2>

### About This Game

4D Minesweeper brings the classic mechanics of Minesweeper into the fourth dimension. In four dimensions, each square can have up to 80 neighbors, giving you plenty of information. This means less chance that you have to guess to progress, and that the relations between the squares become more complex.

It comes with over 80 games that you can load, which can be solved without ever needing to guess.

---

To help you keep track of all those neighbors, the game highlights them for you, when you enter a square.

Additionally the game comes with a delta mode, which displays the number of remaining mines for each square instead of the total number.

Furthermore you have the option to make each dimension spherical, giving you the ability to play on tubes and tori as well as cubes.

Of course, if you want to, you can play one-, two- or threedimensional Minesweeper with this game. (The game will always be presented in two dimensions)

Want a nice start for your game? This game has a button to give you one!

And if you want to stop playing but do not want to lose all your progress in a game, the autosave feature will let you pick right up where you stop the game.

You LOSE! X

You have lost this game :-)

OK

---

It's a pretty basic remake of the classic Minesweeper, but in 4 dimensions

Pros:

- it's 4D
- the "donut" field mode
- the "delta" mode for the numbers lets you exclude some trivial calculations

So-so:

- I recall a few similar games from the 2000s (e.g. Minefield 6D) which had all this stuff and even more features, e.g. 3D, and 5D+ fields. I still like that there is a game on Steam about 4D, finally (I can't wait until Miegacure comes out btw). Though this game, since it's on Steam, should have at least to be better than free old apps out there..

Cons:

- frequent crashes in the recent update (after you start new game and click on cell (0, 0, 0, 0) it seems to always crash
- dull look, and all those "0" tiles which create clutter. Even the original Microsoft's game probably looked better than this one
- I'm pretty sure that using "Minesweeper" in the title is not allowed since the name is Microsoft's trademark. Even on Linux this game was called "Mines" to avoid a lawsuit from MS
- left+right click should open all tiles around the clicked one, if the number of flagged tiles around it is the same as the number on the tile - that's how the original Minesweeper worked

Overall: finally something 4D on Steam, but needs work. So far it looks like a school/student assignment, not ready for a commercial release both in presentation and in feature set.. Runs well, no \u2665\u2665\u2665\u2665\u2665\u2665t and has all the features you would expect Minesweeper to have.

You get exactly what it says in the title, what's more to love?
